Two groups of students were tested in an educational study. One group was taught using the traditional method for learning the addition facts and the other group used this proven new approach to learning. Both groups were given a pretest and later a posttest. The group that used this Music Rap method scored higher. The pretest average was lower before the musical approach and higher on the posttest that followed the musical method. Students love this rhythmic music and always look forward to each session. There are two practice sessions and a section designed especially to allow the learner an opportunity to repeat the answers.
