During childhood the imagination is most active, and this is the period when the mind should become familiar with the choicest gems of thought and expression. The seeds sown in early life must bear fruit in later years. Long before the child can define an authors meaning the spirit of the thought has reached his heart. It is with this firm conviction, based upon schoolroom experience, that the author of this series has gradually led her readers up the steeps of literature. We have now reached the lofty heights and must search among the grand peaks and crags of the works of the world s greatest writers for what will appeal to children and lead them to love the grandeur which they cannot yet fully comprehend. The majority of pupils in our public schools cannot take advantage of our high school privileges; but with libraries at their disposal, and an introduction to the world s best literature, they may continue their education after their school life is ended. It has been the author s aim to collect the best material from the best authors. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
