

A Study Of The Relevance Of Scientific Skills And Attitudes To Market Women

By Adediran Adejuwon

GRIN Verlag Sep 2011, 2011. Taschenbuch. Book Condition: Neu. 210x148x3 mm. This item is printed on demand - Print on Demand Neuware - Bachelor Thesis from the year 2009 in the subject Sociology - Gender Studies, printed single-sided, grade: 1.0, University of Lagos, language: English, abstract: We are daily confronted by science and technology, be it in the home, office, workplace or farm (Ameh 1991). Science offers a lot of possibilities for experimentation which helps to learn about and interpret the environment. It is a powerful tool for the fulfillment of the human potential of all. Scientific attitudes embrace all scientific processes of gathering information with no subjectivity, skepticism or prejudice for the advancement of science. These processes can only be objectively and confidently carried out by skillful individuals. A skill, in this sense, means a proficiency process of carrying out a task with ease, precision and speed (Busari 1995). Various literature were reviewed on the relevance of science with the view of comparing the ideas, opinions, suggestions and assertions of experts under the following areas: scientific literacy, science process skills, scientific attitude, the environment, life coping skills and exposure to science. The research work makes an attempt to determine...
